

Reserve One Afternoon And Evening For The Utah State Fair

Besides a great array of exhibits which have never before been equalled in the West, you will enjoy an entertainment program full of thrills.

Horse Racing, Auto Racing, Auto Polo, Vaudeville, Circus acts and the most spectacular fireworks display ever brought to Utah---The War of Nations.

**Remember the Dates
SEPTEMBER 29 to OCTOBER 6**

The above picture is a portrayal of modern achievements in speed marvels. The locomotive reproduced is the largest and most powerful locomotive ever built. The weight of this monstrous machine is seven hundred thousand pounds. The aeroplane reproduced is the latest model of military construction used in late warfare, and is capable of attaining a speed of over one hundred miles per hour. The automobile reproduction is that of the fastest, highest powered and most expensive racing automobile in the world, the American Blitzen Benz, No. 2.

These three modern speed marvels are reproduced in order to convey to the public the eccentricities in the makeup of "Wild Bill" Endicott, America's dirt track champion. Endicott's original vocation in life was that of a locomotive engineer, where he pulled the throttle for several years on the Big Four railroad, but the sensations afforded by the operation of a locomotive grew tame to Bill. Fourteen years ago he cast his lot as an amateur automobile racing driver, during the period of one-cylinder construction. A year later he qualified as a professional driver. Since that time there are very few tracks of any importance in the entire world upon which Endicott has not been a public favorite as a speed pilot.

Later, when aviation broke into the limelight, the lure of the sensations connected with it attracted Bill's attention, but after a brief schooling under the guidance of DeLloyd Thompson, he decided to discontinue this new pastime, and add to his laurels as a dirt track driver.

In comparing the combined horse power and speed of both the locomotive and aeroplane, the American Blitzen Benz No. 2, with a power ratio of 300 horse power and a weight of 2900 pounds, has a capability of greater speed than either of these.

Endicott will pilot this car at the Utah State Fair.
